## Press Release

August 6, 2010

For Immediate Publication:

### *Notice of Road Construction*

Plainfield, IL -- During the month of August, the Village will have a contractor in several neighborhoods throughout the Village for the purpose of crack filling the roadways. Crack filling seals the lateral and transverse cracks in the roadway surface with hot bituminous filler material. This process helps to prevent the water from entering the asphalt and causing damage with the freeze/thaw cycle.

The Village's 2010 Crack Filling Program will include the improvement of various streets within the Grande Park, Kensington Club, Indian Oaks, Wallin Woods, and Winding Creek subdivisions, as well as Heggs Road between 127<sup>th</sup> and 135<sup>th</sup> Streets.

The crack filling activities will begin during the week of August 9, 2010 and continue daily for approximately two weeks, weather permitting.

All roadways will remain open to traffic during construction; however, delays may occur when flaggers are used to direct traffic while the crack filler material cools sufficiently to allow vehicular traffic to drive upon it during construction operations.

For additional information, please contact:

Greg Heiden  
Transportation Engineer  
Plainfield Public Works Department  
(815) 436-3577
