

Press Release

March 19, 2007

For Immediate Publication:

Normantown Road Closure

The railroad crossing at Normantown Road, approximately 300 feet northeast of US Route 30, has been permanently closed. The Village will abandon Normantown Road from the railroad tracks north to White Ash Drive.

The current closure consists of type III barricades and concrete jersey barriers. The Village will work with the ICC and EJ&E to complete the long term closure which will include pavement approach removal and landscaping.

This closure is consistent with region wide transportation planning and with roadway vacations already undertaken by the City of Naperville north of this location.

Any questions regarding this closure should be directed to the Village Traffic Engineer Eric J. Gallt at (815) 230-2037.
